

MANY REASONS FOR IDLE MINES

A Hundred Reasons, But Not a Single Good One, Declares Mining Writer.

C. A. Dinsmore, who is known over the territory as the travelling mining editor, has put in the past spring among the mines and miners of southern Arizona, and during his visit in Ray last week, made the following observations on the cause of idle mines: "On my present trip horseback through southwestern Arizona I have been rather appalled because of the great number of idle properties. The reason for the idleness is more than two-fold—the low price of copper, the tight money market, the unreasonable prices asked for prospects, the optimism of the owners, the apparent demand for stocks in the 'porphyry copper,' the mismanagement in some cases, the unwarranted acts of promoters in others—pshaw, there are an hundred reasons, and not a good one in all. I have been down shafts, through tunnels, drifts and stopes, have ridden over country on tremendous ledges—have seen so much in this country of real merit that I am indignant that anything whatever shall have happened to temporarily stop operations, and I am positive that people of means and mining knowledge will shortly visit and take over many properties of the greatest merit. There is a give-and-take phase to this business, and none of us should forget our part. The owners of the property must explain its merits by underwriting, must permit the coming in of prospective purchasers on something less than an enormous price with a big spot cash payment. The people of the whole country must help the owner of the prospects to succeed whether it be in promoting a sale or in developing. We must all work together as we have never done before. The tide must turn. What need it matter to us if times are hard, if we will but put our shoulders to the wheel and push mightily? Possibly no man knows as well as I now how 'broke' the average mining man is; but all the same, if he will just learn that the sympathy, the efforts of the people

are with him he will take heart and succeed in spite of adverse circumstances. There is a good saying that it is darkest before dawn; and this I believe. The good Lord knows that if most of us were to take heart in accord with the times we would have given up long ago—but most of us are not of that temperament; we double our fists and fight on and always even in spite of what seems at the time overwhelming difficulties. The mining man has legitimate reason for all his efforts; he has an absolutely clean business if he will; he has every reason to push forward—and in all this the people at large should assist. I don't believe we are going to have 15-cent copper; that any company in this country for many years at least will be able to produce copper at 7 to 6 cents a pound; that 'times' are going to materially brighten for the whole country for a long time, and especially do I not believe that the 'next election' will have much to do with the financial condition of the country—but I do believe that it lies within each one of us to succeed, if each one of us will set stake ahead and in spite of any and every difficulty push forward to that. We may, and will, be able to do what is expected of us and what we desire with all our heart and soul but we may be unable to do it right at once—but if we keep eternally at it, be sincere in every effort and work with all enthusiasm and intensity—then it will come as surely as the sun is in the heavens.

DAILY FASHION TALKS

BY MAY MANTON

A SIMPLE GRACEFUL KIMONO.

THERE is no kimono better suited to the young girl or to the small woman than this one. It is sufficiently full for freedom. The yoke means smooth fit over the shoulders. It takes pretty, graceful lines and it is perfectly simple withal. This one is made of flowered challis and the bands are of silk, but there are so many materials that are appropriate for a kimono that the list is almost prohibitive. For the present season cashmere, challis, cotton crepe are admirable, and later the model can be used for the light weight washable flannels and the band can be made of either contrasting material or of ribbon. Flowered crepes are of admirable weight and are shown in exceedingly attractive and picturesque designs and combined with plain silk and ribbon they are eminently fashionable. The long kimono is apt to be the one most needed, nevertheless the saques often are convenient and this one can be cut in either length. Steam heated houses do not mean the demand for any great warmth even during the cold season, and a great many girls like the pretty kimono silks with trimming of plain color; for such material it is well to make the yoke double while the remainder of the kimono is of one thickness only.

For the 16 year size the long kimono will require 5 1/2 yards of material 27 inches wide, 4 1/4 yards 36, or 3 1/2 yards 44, with 1 1/2 yards of contrasting material, or 3/4 yards of ribbon, 5 inches wide for trimming. For the short kimono will be needed 2 1/2 yards 27 inches wide, 1 1/2 yards 36 or 44 inches wide.

A May Manton pattern, No. 7071, in sizes for misses 14, 16, and 18 years, will be mailed to any address by the Fashion Department of this paper, on receipt of ten cents.

RICH CHALCOPYRITE IN COPPER QUEEN

Property Owned by Texans, Who Are Confident of Mine's Future.

News of a valuable strike on the property of the Copper Queen Gold Mining company at Stoddard, was brought to Prescott last Friday, says the Journal Miner, by John Cain, a well known mining man of that district. In a cross cut tunnel which is in 340 feet, a round of shots on Thursday evening broke open a body of high-grade chalcopyrite are covering the entire breast of the tunnel. Samples were brought to town and it is believed that they will assay remarkably high in copper and gold in fact, the tunnel has been in ore for 160 feet, copper sulphide having been encountered 150 feet from the mouth of the tunnel. The extent of the chalcopyrite which is at a depth of 200 feet from the surface is yet to be determined, but there is every reason for believing that it will develop into a very large body.

While there has been considerable exploration work done on the property which consists of 320 acres, this tunnel is recent work and was undertaken by Louis Goldman, the general manager who is on the ground. Mr. Cain who inspected the strike is very enthusiastic over the prospects of the property and predicts that it will be one of the big mines of the county. The formation is especially favorable for a producer, being black slate schist and porphyry.

A group of men in Paris, Texas are the owners of the property and it is said to be well financed for large operations.
